

Pimp My Wall
Interactive displays

Giant touch screens and drawing portals

At Pimp My Wall, we developed a unique technology that allows us to create **large touch surfaces**.

By simply touching the screen, you can draw in a very intuitive way. You can also **connect two screens together** to build **synchronized drawing portals!**

Our system is unique because it takes **the entire shape of the contact surface** into consideration instead of a single point or pixel like other technologies.

The drawing surface thus becomes like a painting surface on which you can paint with your hand, arm or even the entire body!

Perfect for all ages

Fun and easy to use

Night-time installation
