

Pimp My Wall  
Interactive displays

## Virtual scrapbook for weddings

Give your guests the possibility to **make a doodle on your wedding photos** and display them on a screen or projector, giving this special day a personal and high-tech touch!

Our system is designed to instantaneously fetch **photos from your photographer** and add an artistic touch to it using a tablet.

You then have the possibility to get a digital version of these doodles or even to make an album with them!

Pimp My Wall is compatible with all TVs and projectors and works **completely automatically** so you can enjoy the party!

Fun and decorative

Easy for your photographer

For TVs and projectors
